

Seward Glenn Mobility PEL Study

June 1, 2022

Community Advisory Committee

Welcome & Opening Remarks

Public Comments

Comment Period: January 24 – February 28, 2022

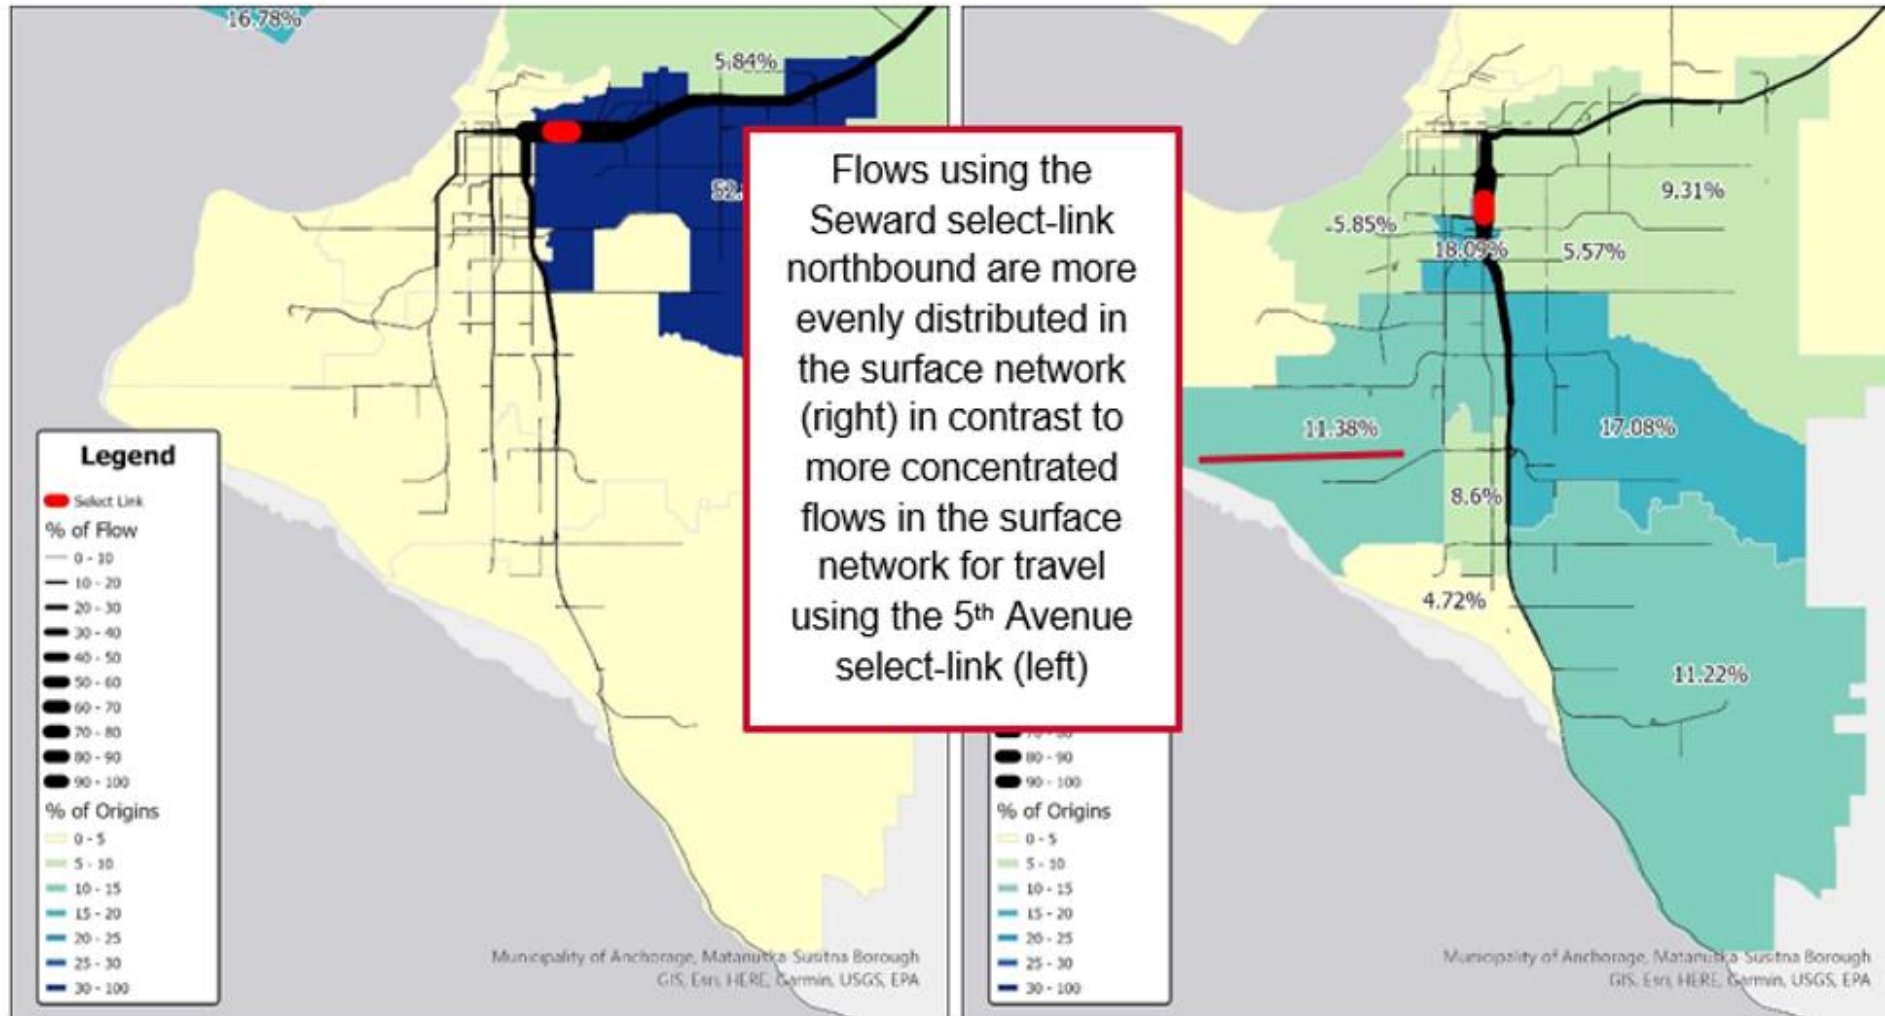

The public submitted a grand total of 419 comments focused on the following themes:

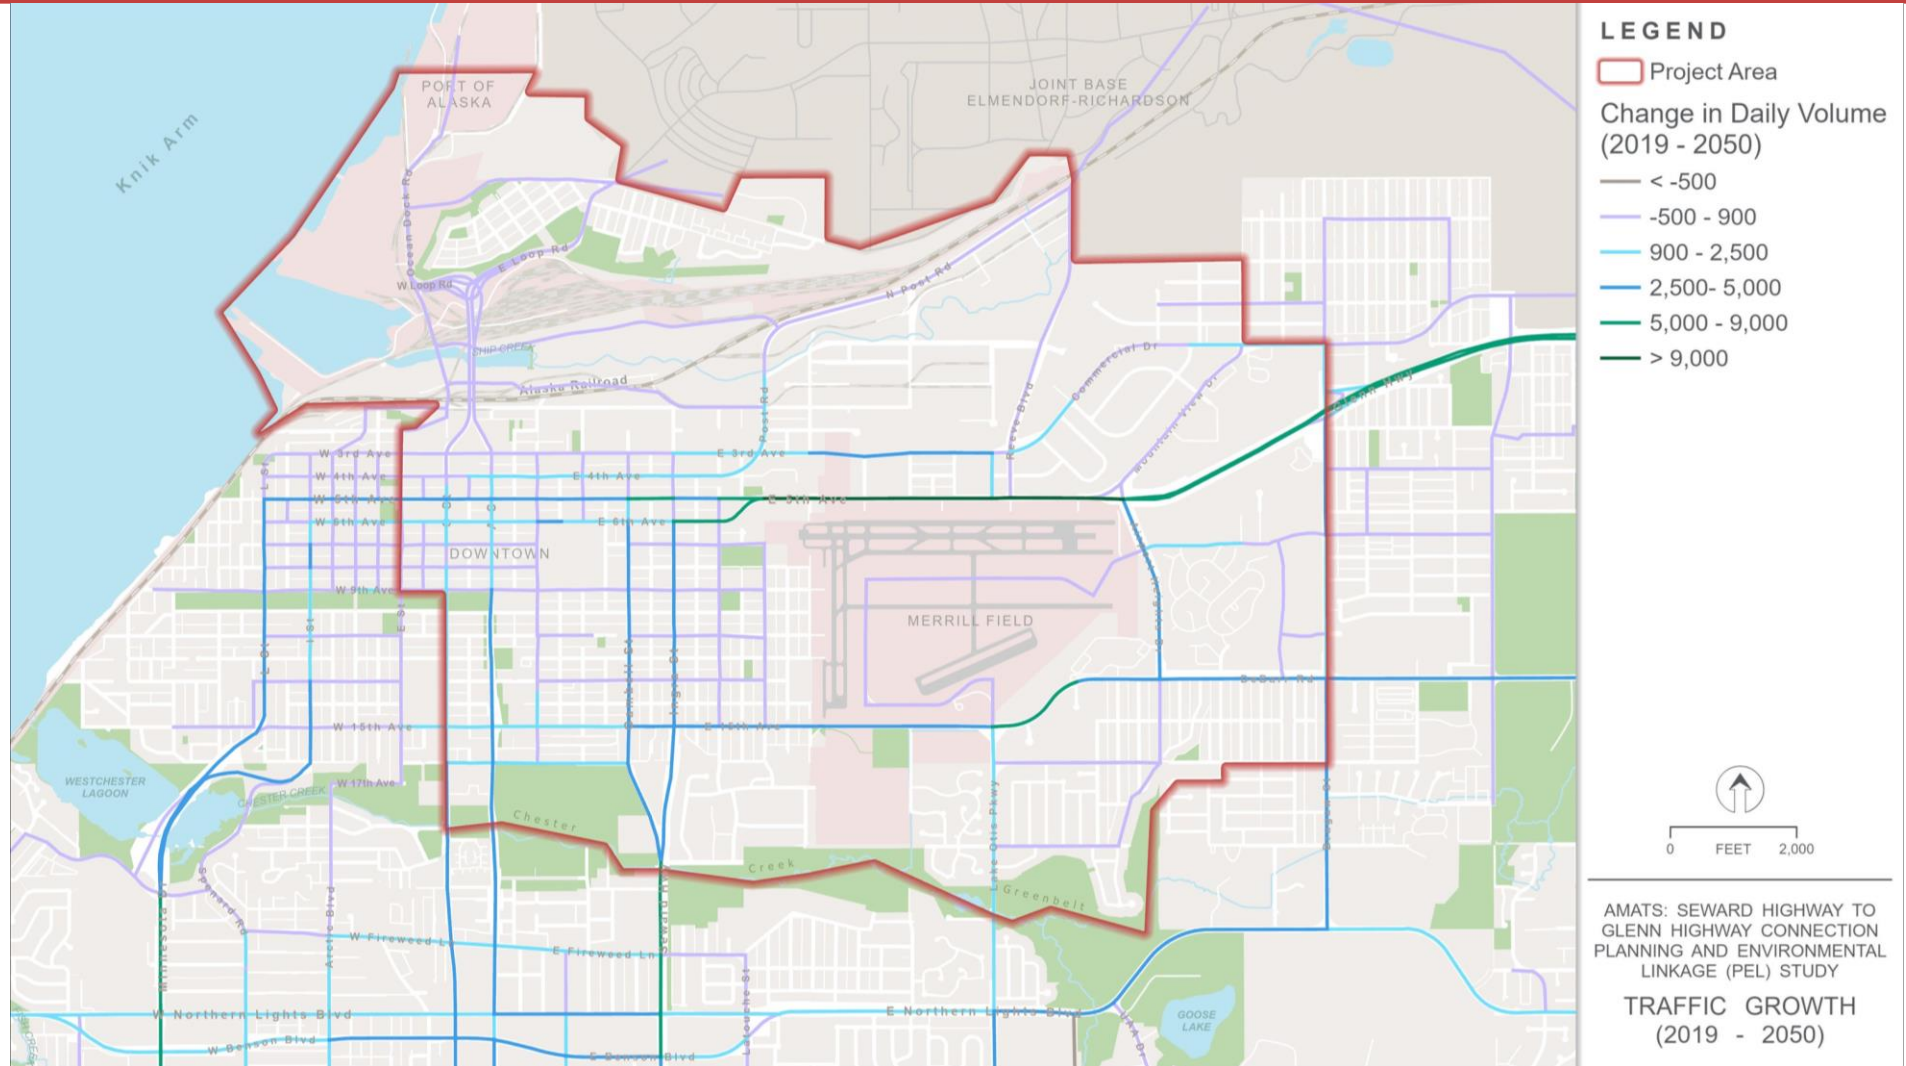

Non-motorized Issues/Needs Heat Map

Origin and Destination Study

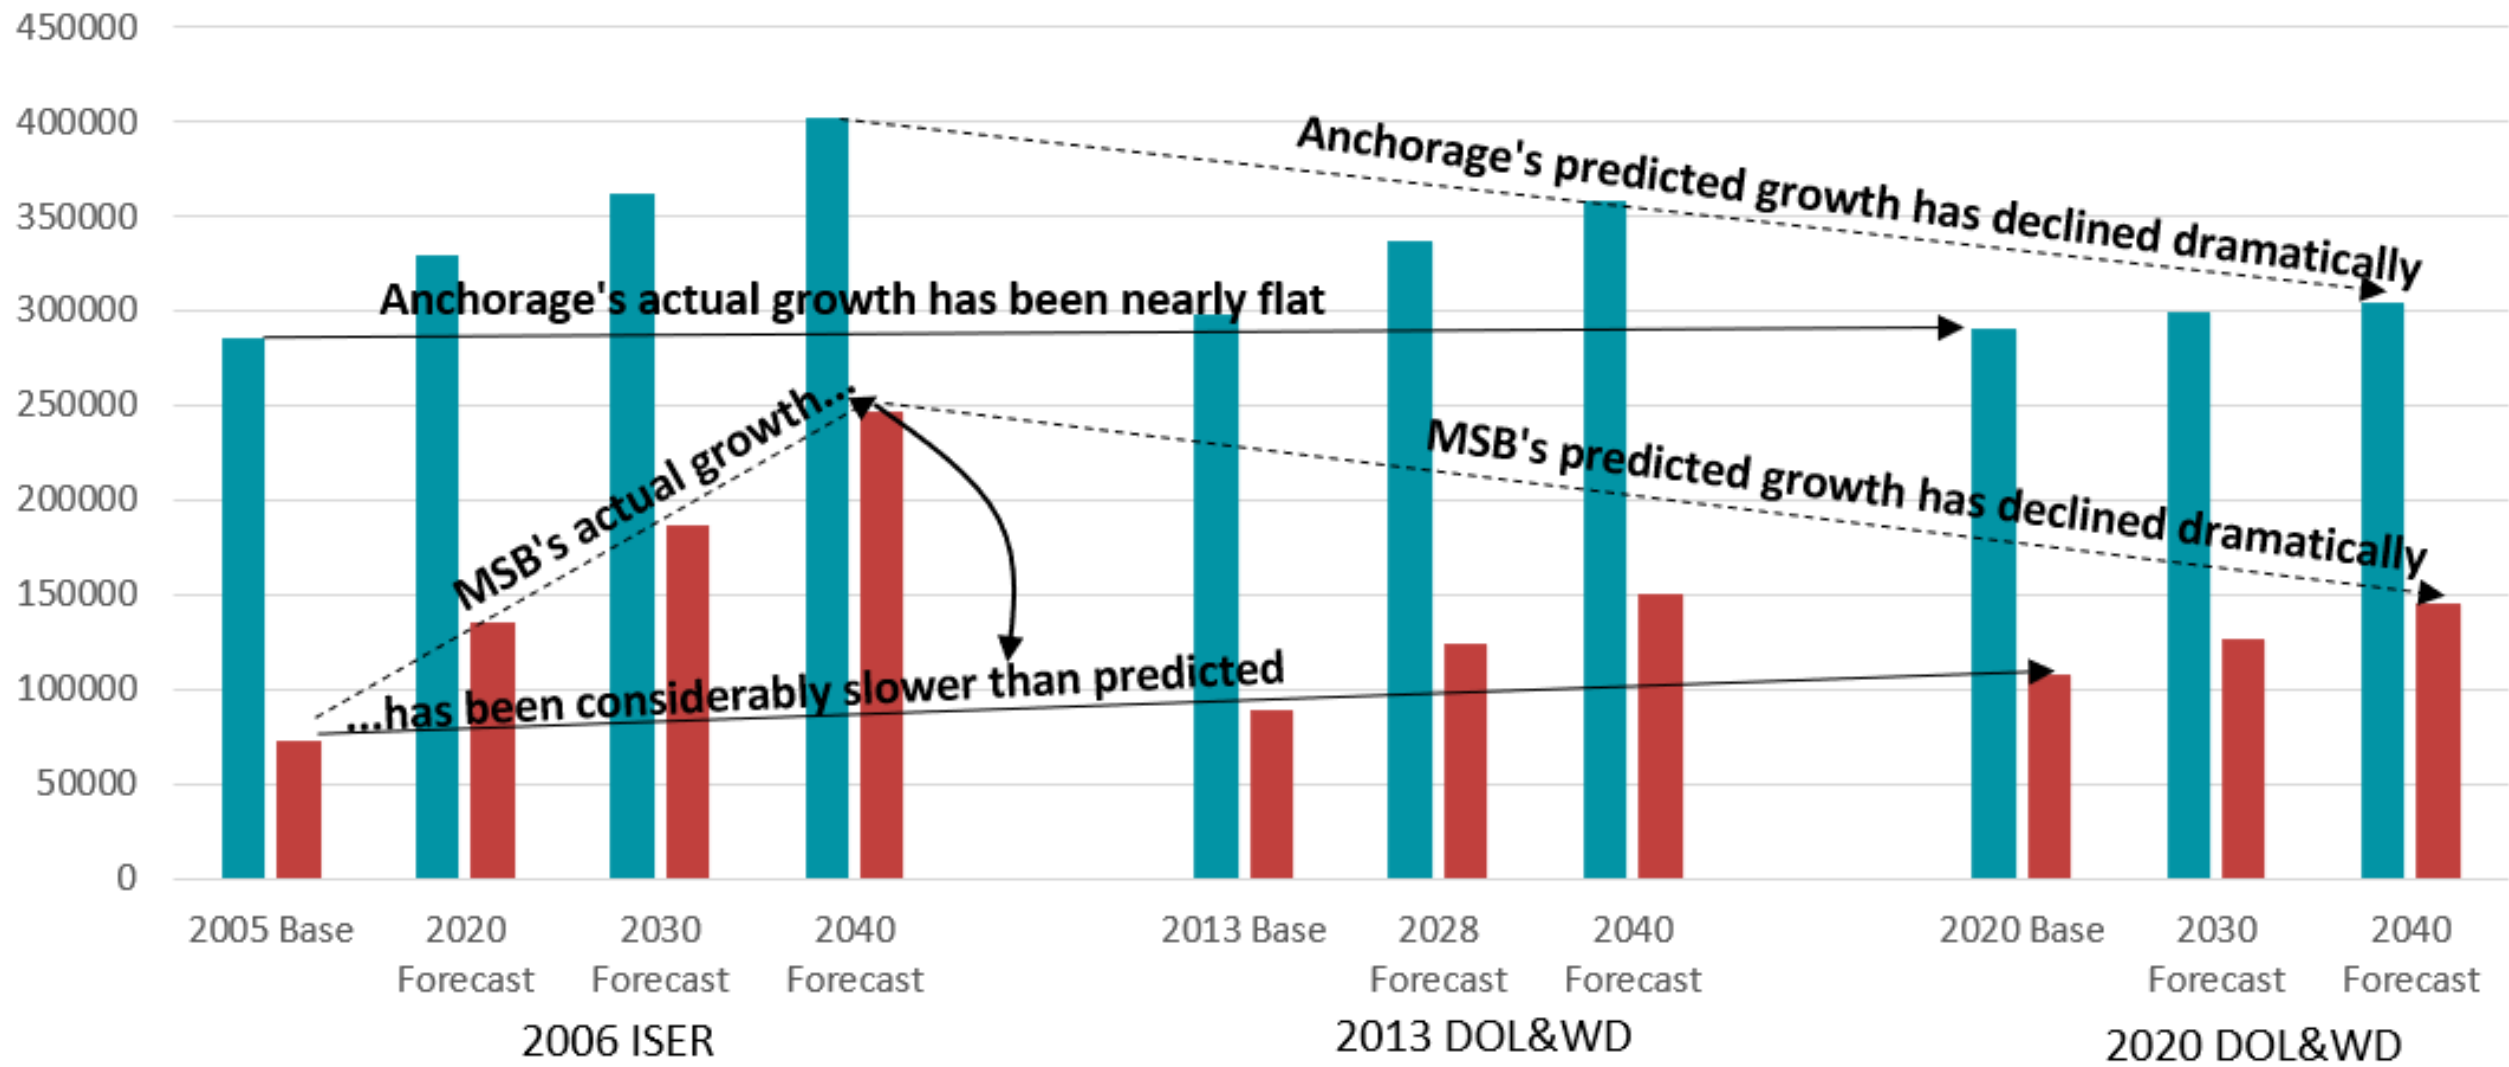

Traffic Growth

Population Forecast Changes

Population Forecast Changes over Time

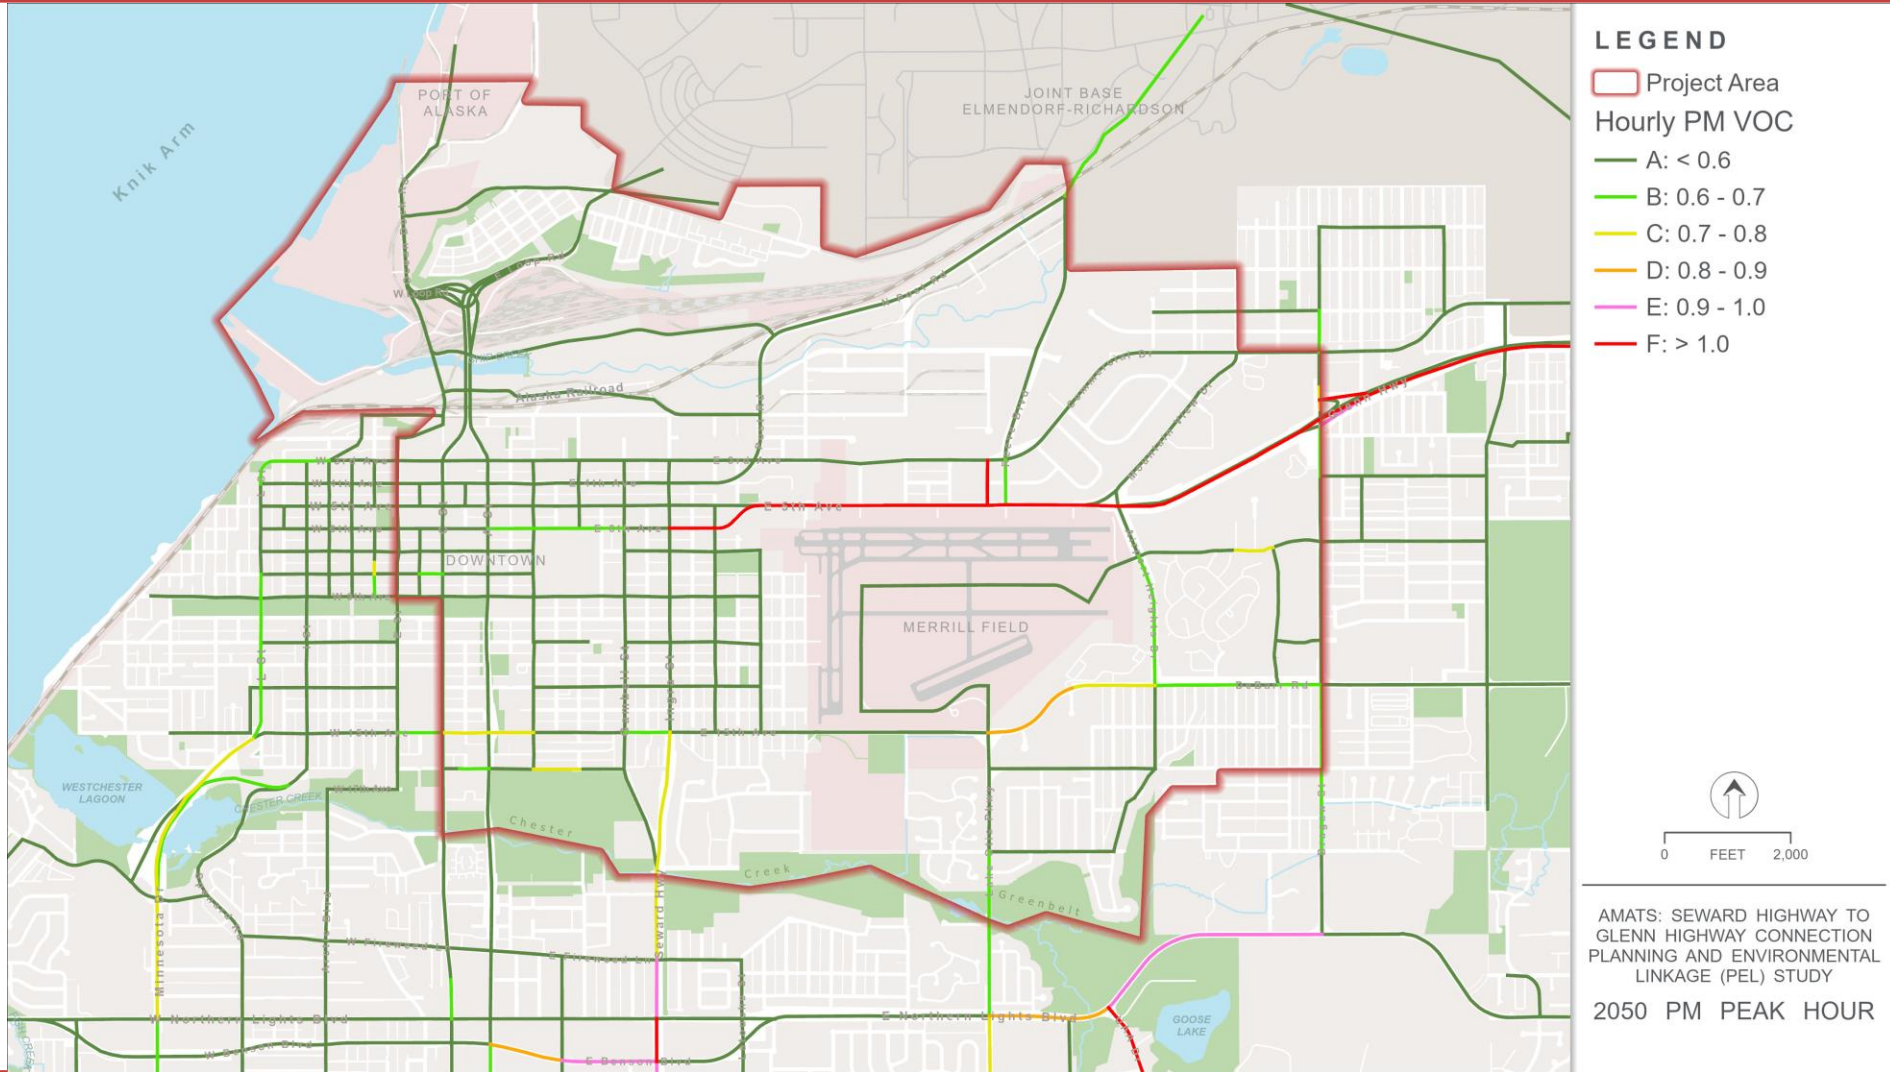

■ Anchorage ■ MSB

2050 PM Peak Period Congestion

2050 PM Peak Hour Congestion

Draft System Performance Report

1  Legislation

2  Project Status

3  System Linkage

4  Capacity

5  Transportation Demand

6  Social Demand or Economic Development

7  Modal Interrelationships

8  Safety

9  Roadway Deficiencies

Draft Purpose Statement

The purpose of the PEL Study is to improve mobility, accessibility, and safety for people and goods traveling by all modes on or across the roadway system connecting the Seward Highway, the Glenn Highway, and the Port of Alaska.

The intent is (1) to maintain the functionality of the National Highway System, (2) meet the local travel needs of residents who must safely travel across or along those roadways, and (3) improve neighborhood connections.

Draft Needs Statement

Conflicting Travel Functions

Serving competing regional and local travel functions on the highway network in the study area leads to conflicts that reduce mobility, safety, and accessibility for all users.

Safety

Crashes for vehicles and people walking and bicycling are elevated at several study area intersections.

Social Demands and Economic Development

Current street design on the Seward/ Glenn corridor in the study area is inconsistent with the vision expressed in recently adopted development plans and is adversely affecting neighborhood redevelopment efforts, community cohesion, and quality of life.

Draft Needs Statement

Conflicting Travel

Serving competing regional and local travel functions on the highway network in the study area leads to conflicts that reduce mobility, safety, and accessibility for all users.

Safety

Crashes for vehicles and people walking and bicycling are elevated at several study area intersections.

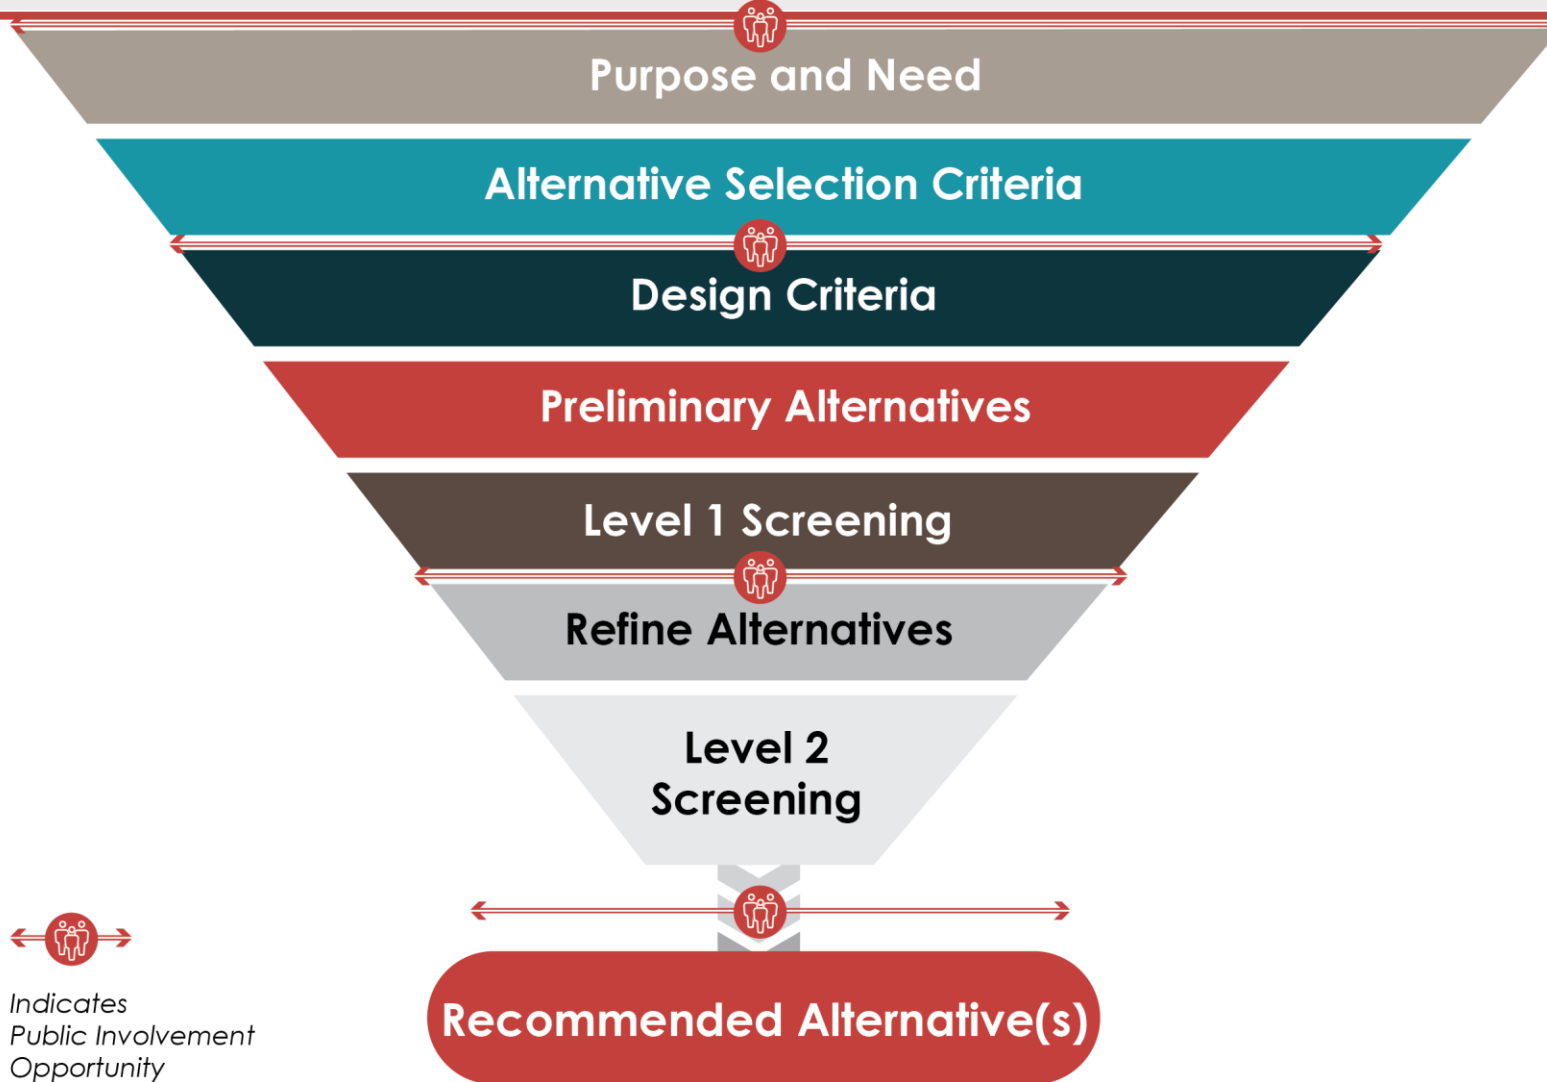

Social Demands

Current street design on the Seward/ Glenn corridor in the study area is inconsistent with the vision expressed in recently adopted development plans and is adversely affecting neighborhood redevelopment efforts, community cohesion, and quality of life.

Alternative Screening Process

Described in the Draft Recommended Alternative Selection Criteria Memorandum

Public Involvement
Opportunity

Draft Level 1 Evaluation Criteria

Described in the Draft Recommended Alternative Selection Criteria Memorandum

Need	Measure
Safety 	Number of crashes with the Build Condition compared to the No Action condition
	Number of conflict points between vehicles and non-motorized users
	Number of vehicle conflict points with the Build Condition compared to the No Action condition
Conflicting Functions 	Peak period freight travel time
	Peak period travel time
	Miles of roadway in study area that have a peak period volume-to-capacity ratio above 0.8
	Peak period delay
	Miles of road with an average peak period travel speed within 20% of design speed
Social Demands and Economic Development 	Consistency with Anchorage 2020, 2040 Land Use Plan, Fairview Neighborhood Plan, and other land uses plans
	Regional VMT
	Regional VMT per capita
	Impacts to Section 4(f) resources

Schedule

WE ARE HERE

We want your input!

- **Draft Documents:**
 - Purpose and Need Statement
 - System Performance Memorandum
 - Recommended Alternatives Selection Criteria Memorandum
- **Alternatives and Solutions**
 - What are ways to solve the problems and meet the corridor needs?

We want your input!
